

SENNHEISER

Product Update

MOMENTUM True Wireless 3

Dear Colleagues and Partners,

We would like to announce the release of a new Firmware (R2.10.19) available today in the Smart Control App. With this update we will be enhancing customer experience by delivering the following features and improvements:

- Bluetooth multipoint connectivity
- 96kHz audio mode enable/disable switch
- Transparency mode can be activated manually when only single earbud is in use
- ANC stability improvements
- Touch control blocked when earbud is outside of the ear
- Bluetooth performance optimizations
- Further performance and stability improvements

For further information, feel free to read our press release [here](#).

Best regards,

Daniela Grillo de Lambarri
