

BRYSTON

BryFi Wireless Audio

2020

For too long, music enthusiasts have had to sacrifice the exceptional performance they have come to expect from a Bryston audio system when selecting components that offer wireless connectivity and a smaller form factor. To that end, Bryston is proud to introduce a collection of outstanding new products designed to make hi-fi a breeze to own and fit in just about any space while still providing inspirational sound quality.

Built for Streaming

When Bryston designed BryFi, they recognized that most of your music listening comes from streaming services and your digital collection. So Tidal and Spotify are built right in. You can also stream to BryFi from your iOS devices using Apple® AirPlay. BryFi even supports UPnP and can connect to a USB disk or NAS to stream your own digital music collection. But streaming isn't your only option. Use the analog auxiliary inputs to connect a portable music player. Or use the optical input to connect your TV. BryFi is versatile, compact and sounds astonishingly clear and detailed.

Control

Controlling BryFi is easy. Use our free apps available on both Google Play and the App Store, or simply use the web browser from a computer, phone or tablet. You can switch inputs, adjust volume, make playlists and more all from your favorite digital devices.

Speakers for Every Room

No one speaker fits every room. That's why we've engineered BryFi to fit each need differently. Use the Bryston floor standing wireless A1 or A2 speakers for your main listening lounge. Bryston's wireless Mini A bookshelf speakers fit nicely on a shelf or tabletop. Use the BB-1 Soundbar + Sub under a TV. Or when your space is seriously constricted, place the attractive and great sounding BW-2 or BW-2 Mini on an end table or countertop.

Whole House Synchronization

Make BryFi the hub of your whole house audio oasis. Synchronize up to 10 rooms or just select zones to hear your tunes wherever you go.

Sound From Any Source

Each loudspeaker communicates wirelessly using a device that connects to your home network, enabling you to stream digitally, control the system, receive audio from outside sources and of course send audio effortlessly to other Bryston wireless loudspeakers. Each Bryston wireless transmitter can support up to two speakers plus one subwoofer. The transmitter is compatible with our wireless Mini A, wireless A2 and wireless A1 wireless loudspeakers, giving you a size that fits any décor. A simplified transmitter is available for adding a wireless subwoofer to otherwise wired systems.

- Built-in WiFi or ethernet
- Bluetooth
- Connect USB disk with music library
- Analog in for legacy sources
- Optical digital input from TV or other digital source.

Simple Setup

Instead of struggling with a whole loom of cables, you'll only need to connect power to your BryFi. Each speaker and transmitter simply needs connection to power. That's it! The speakers stay paired with the transmitter on their own self-managed wireless network even after the system powers off. The speakers are marked clearly left or right. Enjoy dynamic, rich sound with incredible ease of use.

Beautiful App

Whether you use a BryFi dedicated app or the web-based interface, you'll find the experience to be responsive and a joy to operate. All functions of the system including playback, volume control, and input selection can be accessed either from the app or from the transmitter (or directly on the BW-2 and BW-2 Mini). Great music is only one simple touch away!

True Multi-Zone

Each zone can be controlled individually. Or group zones to synchronize audio around the house. BryFi isn't just about streaming sound. Every system has auxiliary inputs for external sources like optical digital for TV audio and analog input for vinyl (phono preamp needed). BryFi means getting getting the best sound possible regardless of source all around your home.

Bedroom:

BB-1 Soundbar + Sub is the perfect upgrade for TV sound in compact spaces

Office:

Place a pair of Wireless Mini A speakers on your desk for the ultimate computer audio.

Kitchen:

BW-2 Mini tucks neatly on the counter and has a top finished to match the cabinetry

Living Room:

A1 Wireless loudspeakers and Wireless T-12 sub make the ultimate easy-to-use 2.1 theater for movie night. Plus, hear your music like you've never heard it before!

Patio:

BW-2 is perfect with its big sound and long lasting battery

Take It With You

Love your music on the go. The BW-2 and BW-2 Mini work with optional batteries for up to 16 hours of continuous playback wherever you may travel—whether cross-country or just out to the back patio. Stream with Bluetooth, tether it to your mobile phone’s data connection, or even use the BryFi’s own hotspot mode. Charge your mobile tech from the rear USB port to keep the good times flowing. The rear bass-reflex vent doubles as a comfortable handle to easily carry your BryFi along with you.
